

Sailingschedule.com - <https://www.sailingschedule.com/>

This is a domain that is used by WWA to create "Customized Sailing schedule web links" for its customers, to either use directly or to embed on their own website.

The customizations offered are in terms of the following:

1. Routing Details - Origin (Region/Country/City) to Destination (Region/Country/City)
2. Layout to be selected for Sailing Schedule result display.
3. Colours & fonts (type and size).
4. Add the customer's company Logo to personalize the whole look.
5. Add any special instructions/Conditions/text on the page as required by the customer.

A login is needed for the role of a Sailing Schedule Admin who would be responsible for creating the customized sailing schedule links.

Upon login, the user should see a dashboard that lists all the existing schedules created by the user with an edit & delete option. A 'add new' button should also be present to create a new link.

A. Create/Edit a link:

Section 1

--> Choose Format: WWA offers multiple layouts for its Sailing Schedule search result display. Admin can choose the one applicable for the customer.

Section 2

--> Select the Customer

--> Schedule display preference (public or private)

Section 3

Choose the routing details: Multiple rows should be allowed, as a user can choose any/multiple combinations from the option mentioned below. E.g. Region to Country, City to Region, etc.

Origin (Region/Country/City/All)

Destination (Region/Country/City/All)

B. Preview and Publish

- Once all the values are entered for the above sections, a sample link should appear which would be a preview of the Final Sailing Schedule link that would get created.

- User should have the option to customize the appearance like changing of the color schema for labels/tables/headers, adding Logo, changing font (type and size), etc.

- Once published a link should get generated and should start appearing in the dashboard mentioned above. The link should be shareable.

Sample link for expected appearance: [Sailing Schedule Link](#)

Region Admin

The Regions used while creating a Routing are basically group of countries. We need a separate admin section for defining regions.

In the admin section, all the existing regions available for the user should be listed with the option to edit/add/delete.

Customer Admin

An admin section for maintaining the list of WWA customers would be needed. The section would have the following items. The provision to add/edit/delete the customer should be available.

--> Customer Name

--> Customer alias

--> Customer SCAC

Screenshots of Mock-up:

Dashboard:

Region Admin:

The screenshot shows a web interface for 'Region Admin'. At the top, there are navigation links: 'Create A Link', 'Region Admin' (which is underlined), and 'Customer Admin', along with a globe icon. The main content area contains a form with two input fields. The first field is labeled 'Region Name : *' and has a red border with the error message 'Region Name is required.' below it. The second field is labeled 'Countries: *' and has a red border with the error message 'Country required.' below it. Below the fields are two buttons: 'Go Back' and 'Add'.

Add/Delete/Edit Region pages:

This screenshot shows the same 'Region Admin' form, but now the 'Region Name' field contains the letter 'A'. The 'Countries' dropdown menu is open, showing a list of countries including Afghanistan, Aland Islands, Albania, Algeria, American Samoa, Andorra, Angola, Anguilla, and Antarctica. The 'Go Back' and 'Add' buttons are still visible below the form.

Customer Admin:

We need to fill the below details and click on Add:

Customer Alias : *

Customer Name : *

Customer Scac : *

Status : *
